

# HydroFlush

The HydroFlush is suitable for pumping shower water to a higher level when gravity drainage is not possible and/or economical to install.

The compact HydroFlush chamber offers a low level inlet suitable for accepting the waste from a standard shower tray trap. The slim line design allows concealed installation underneath a raised shower tray for inconspicuous installation.

The system consists of a sealed polyethylene chamber, internal and external pipe work and fittings, automatic 'OpenFlow' pump and uPVC outlet connection.

## KEY FEATURES

- Designed to accept waste from all conventional shower tray traps
- Concealed installation possible using raised shower tray
- Edincare 'OpenFlow' technology offers pumping of waste water through small bore pipes
