

Magna200Pro (Macerator Model)

The Magna200Pro (Macerator Model) fully automatic packaged pumping station is suitable for pumping grey and foul water to a higher level when gravity drainage is not possible and/or economical to install.

The system provides 200 litre storage capacity, ideal for accepting waste from an extension, outbuilding, basement or similar. Utilising Edincare's 'SemiCut' impeller technology the system offers reliable and effective pumping of grey and foul water. The compact chamber offers ease of installation for sites with limited space.

The system consists of a polyethylene chamber, locking access cover, internal pipework and fittings, one automatic 'SemiCut' submersible pump and external compression adaptor.

The system is easy to install as inlets can be positioned to your requirements (inlet information to be supplied at time of order).

KEY FEATURES

- Edincare 'SemiCut' technology offers a cutting action with small solids clearance to reduce the chance of blockages
- Compact chamber for limited space installations
- Ideal for an extension, outbuilding, basement or similar
- Variable inlet positions
- A range of alarms and remote alerts are available offering peace of mind
- Easy to install

PUMP CURVE
