

Remota90

The Remota 90 is a fully automatic floor mounted pumping system suitable for pumping waste from a complete bathroom to a higher level when gravity drainage is not possible and/or economical to install.

The system is suitable for installing either at the initial building stage or retro fitting to existing buildings and can accept waste connections from a toilet, basin, shower or bidet. The Remota 90 consists of a 90 litre polyethylene chamber with 110mm inlet connection, submersible 'OpenFlow' pump, internal pipe work and 1 1/2" PVC outlet connection.

The system does not need to be connected directly onto the toilet and as so is ideal for remote installation (indoors only) therefore the system can be concealed out of sight. The system is highly reliable and easy to maintain due to its clip-on lid.

KEY FEATURES

- Designed for remote installation, can be concealed out of sight
