

# AquaFlush

The AquaFlush is suitable for pumping grey water to a higher level when gravity drainage is not possible and/or economical to install.

The AquaFlush is designed for light duties. The unique chamber is ideal for accepting waste from utility sinks, wash basins, tea points or similar. Utilising Edincare's 'OpenFlow' impellor technology the range discharges through small bore pipe work for installation through busy service voids and roof spaces.

The system consists of a sealed polyethylene chamber, internal pipe work and fittings, automatic 'OpenFlow' submersible pump and solvent weld outlet connection.

The AquaFlush is easy to install as the unique space saving chamber can be fitted in the corner of an enclosed space, and also provides a number of inlet and outlet locations.

## KEY FEATURES

- Edincare 'OpenFlow' technology offers pumping of waste water through small bore pipes
- Unique chamber offers space saving installation and a number of inlet and outlet locations
- Standard version for light duty applications, solids clearance up to 10mm
- A range of alarms and remote alerts are available offering peace of mind to the end user

## PUMP CURVE

## DIMENSIONS

CHAMBER	LENGTH	WIDTH	HEIGHT
	345mm	400mm	390mm

## WEIGHT

TOTAL BOXED WEIGHT
5.3 KG

## TECHNICAL SPECIFICATION

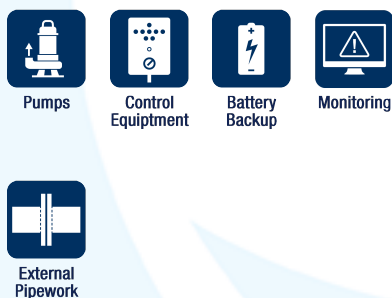

CHAMBER	
Colour	White
Material	ABS
Capacity	40 l
Lifting eyes	No
Discharge size	32mm

PUMP	
No. of pumps	1
Pump type	Vortex
Power supply	1 PHASE
Rated current	2.11A
Motor rating	460W
Revolutions per min.	2900rpm
Max. vertical	6m
Max. flow rate	2.6 l/sec
Frequency	50 Hz
Max liquid temp.	<40°C
Cable length	3m

## SUITABLE FOR

## OPTIONAL EXTRAS

## WASTE TYPE

All our products can be customised to your requirements. For more information on this please contact our Sales Team on **01442 211554**.

## PROJECTS

## SITE SURVEYS

We offer no obligation On Site Surveys and Inspections of pumping schemes for refurbishment, installations, servicing, insurance assessment and general feasibility studies.

Our team of experienced Project Coordinators will survey your site to fully assess the specific requirements of your pumping scheme. Our Project Team will work with you to manage the process from start to finish.

The pumping scheme will be fully inspected mechanically, electrically and for operational capability with a full report of our findings, recommendations and quotation supplied.

## PROJECT DESIGN

We offer a full in-house design service working from either site drawings, or where appropriate, undertake no obligation On Site Surveys.

Our Project Team will produce a detailed technical specification and quotation considering all technical parameters (application, location, flow rate, medium type, electrical supply plus ensure it adheres with current regulations).

Our Project Coordinators are trained in all technical aspects to ensure that the most cost effective and efficient solution is offered.

## INSTALLATIONS

Our services range from the installation of new control equipment, submersible pumps through to full pump station refurbishments.

Customers can simply assign the responsibility for the installation to our Project Team knowing that our team of experienced Project Coordinators and Service Engineers will complete the installation on time and within budget.

Upon completion a handover service is offered where our technical representative will attend site and conduct an onsite demonstration of the equipment.

## APPLICATION

## AFTER SALES

We offer a comprehensive range of after sales services that include:

- Planned servicing
- Emergency call-outs
- Commissioning
- Monitoring
- Tankering and Jetting

Our engineers are fully trained in all aspects of working with pumped drainage systems, as well as being specifically trained in the use of gas detection equipment, confined space entry procedures and all relevant health and safety legislation.

Please contact our aftersales department on 01442 211554 for further information.

## MAINTENANCE

The product should be inspected every three months.

A full visual inspection should be undertaken to the product to assess its overall condition, this must include all electrical and mechanical components.

In addition to the above it is important that the product undergoes regular servicing. As with all systems of this nature, regular maintenance is essential to ensure the system operates at its optimum level and fulfils its expected lifespan. The product must be maintained at intervals of:

Once per annum - Single residential dwelling  
Twice per annum - Single residential dwelling where there is a risk of flooding as a result of product failure (for example, basement applications) & Multiple residential dwellings  
Four times per annum - Commercial premises

## HEALTH &amp; SAFETY

Edincare Pumps are registered with British Safety Council, Constructionline, Safe Contractor, CHAS, ISO, Basement Waterproofing Association, PCA, FORS & NICEIC demonstrating our commitment to Health and Safety and our quality of workmanship.

## DELIVERING PUMPED SOLUTIONS NATIONWIDE

Edincare Pumps has been established for over 25 years specializing in the manufacture, project design, sale, commission, service and repair of pumped drainage solutions.

## OUR PRODUCT RANGE

- Packaged pumping stations
- Waste water pumping systems
- Macerators & macerating toilets
- Floor mounted pumping stations
- Fat, oil & grease separating systems
- Rainwater harvesting systems
- Battery Backup Systems
- Adoptable Pumping Stations

## CHOOSE WITH CONFIDENCE

-  1 year guarantee
-  Service agreement
-  Commissioning
-  Availability
