

BlueMax

The BlueMax fully automatic pumping station is suitable for pumping condensate to a higher level when gravity drainage is not possible and/or economical to install.

The robust and unobtrusive system can be wall or floor mounted for versatile installation. The compact chamber is ideal for accepting waste from condensate boilers, steam ovens, refrigeration systems or similar. Utilising Edincare's 'OpenFlow' impeller technology the range discharges through small bore pipe work for installation through busy service voids and roof spaces. The system is fitted with the facility to connect to a building management system or similar providing early warning of pump failure.

The system consists of a sealed chamber, internal pipe work and fittings, automatic pump and small bore evacuation tube outlet connection.

KEY FEATURES

- Compact, sealed chamber for simple installation
- Reliable motor for very low flows
- Fault signal for BMS provided as standard
- The BlueMax is easy to install due to the small chamber discharge pipe sizes.

PUMP CURVE

DIMENSIONS

CHAMBER	LENGTH	WIDTH	HEIGHT
	249mm	123mm	179mm

WEIGHT

TOTAL BOXED WEIGHT
2.9 KG

TECHNICAL SPECIFICATION

CHAMBER	
Colour	Blue/ White
Material	ABS
Capacity	N/A
Lifting eyes	No
Discharge size	9.5mm

PUMP	
No. of pumps	1
Pump type	Diaphragm
Power supply	1 PHASE
Rated current	0.6A
Motor rating	75W
Revolutions per min.	2800rpm
Max. vertical	4.5m
Max. flow rate	0.081 l/sec
Frequency	50Hz
Max liquid temp.	<65°C
Cable length	1.8m

SUITABLE FOR

OPTIONAL EXTRAS

All our products can be customised to your requirements. For more information on this please contact our Sales Team on **01442 211554**.

WASTE TYPE

PROJECTS

SITE SURVEYS

We offer no obligation On Site Surveys and Inspections of pumping schemes for refurbishment, installations, servicing, insurance assessment and general feasibility studies.

Our team of experienced Project Coordinators will survey your site to fully assess the specific requirements of your pumping scheme. Our Project Team will work with you to manage the process from start to finish.

The pumping scheme will be fully inspected mechanically, electrically and for operational capability with a full report of our findings, recommendations and quotation supplied.

PROJECT DESIGN

We offer a full in-house design service working from either site drawings, or where appropriate, undertake no obligation On Site Surveys.

Our Project Team will produce a detailed technical specification and quotation considering all technical parameters (application, location, flow rate, medium type, electrical supply plus ensure it adheres with current regulations).

Our Project Coordinators are trained in all technical aspects to ensure that the most cost effective and efficient solution is offered.

INSTALLATIONS

Our services range from the installation of new control equipment, submersible pumps through to full pump station refurbishments.

Customers can simply assign the responsibility for the installation to our Project Team knowing that our team of experienced Project Coordinators and Service Engineers will complete the installation on time and within budget.

Upon completion a handover service is offered where our technical representative will attend site and conduct an onsite demonstration of the equipment.

APPLICATION

AFTER SALES

We offer a comprehensive range of after sales services that include:

- Planned servicing
- Emergency call-outs
- Commissioning
- Monitoring
- Tankering and Jetting

Our engineers are fully trained in all aspects of working with pumped drainage systems, as well as being specifically trained in the use of gas detection equipment, confined space entry procedures and all relevant health and safety legislation.

Please contact our aftersales department on 01442 211554 for further information.

MAINTENANCE

The product should be inspected every three months.

A full visual inspection should be undertaken to the product to assess its overall condition, this must include all electrical and mechanical components.

In addition to the above it is important that the product undergoes regular servicing. As with all systems of this nature, regular maintenance is essential to ensure the system operates at its optimum level and fulfils its expected lifespan. The product must be maintained at intervals of:

- Once per annum - Single residential dwelling
- Twice per annum - Single residential dwelling where there is a risk of flooding as a result of product failure (for example, basement applications) & Multiple residential dwellings
- Four times per annum - Commercial premises

HEALTH & SAFETY

Edincare Pumps are registered with British Safety Council, Constructionline, Safe Contractor, CHAS, ISO, Basement Waterproofing Association, PCA, FORS & NICEIC demonstrating our commitment to Health and Safety and our quality of workmanship.

DELIVERING PUMPED SOLUTIONS NATIONWIDE

Edincare Pumps has been established for over 25 years specializing in the manufacture, project design, sale, commission, service and repair of pumped drainage solutions.

OUR PRODUCT RANGE

- Packaged pumping stations
- Waste water pumping systems
- Macerators & macerating toilets
- Floor mounted pumping stations
- Fat, oil & grease separating systems
- Rainwater harvesting systems
- Battery Backup Systems
- Adoptable Pumping Stations
