

Flood Pump Kit

The Flood Pump Kit is designed to remove flood water from your property with speed and efficiency. The pump can operate within the filter chamber for extra protection or independently as required. With manual operation the pump can reduce the water level to 40mm.

The system consists of a slotted polyethylene chamber with a removable automatic waste water submersible pump and delivery hose.

The system is fully portable and is ideal for emergency situations. It is an ideal system to provide peace of mind to those with basements or low lying property.

KEY FEATURES

- Completely portable and automatic
- Filter chamber provides protection to pump, but can be used independently in clean water environments
- Manual pumping to low level (40mm)
- High output flow of up to 10,000 litres per hour

TECHNICAL SPECIFICATION

CHAMBER	
Colour	Grey
Material	ABS
Capacity	N/A
Lifting eyes	No
Discharge size	1 1/4"
PUMP	
No. of pumps	1
Pump type	Vortex
Power supply	1 PHASE
Rated current	1.5A
Motor rating	350W
Revolutions per min.	2800rpm
Max. vertical	6.5m
Max. flow rate	2.71 l/sec
Frequency	50Hz
Max liquid temp.	35°C
Cable length	3m

All our products can be customised to your requirements. For more information on this please contact our Sales Team on **01442 211554**.

Flood Pump Kit

PROJECTS

SITE SURVEYS

We offer no obligation On Site Surveys and Inspections of pumping schemes for refurbishment, installations, servicing, insurance assessment and general feasibility studies.

Our team of experienced Project Coordinators will survey your site to fully assess the specific requirements of your pumping scheme. Our Project Team will work with you to manage the process from start to finish.

The pumping scheme will be fully inspected mechanically, electrically and for operational capability with a full report of our findings, recommendations and quotation supplied.

PROJECT DESIGN

We offer a full in-house design service working from either site drawings, or where appropriate, undertake no obligation On Site Surveys.

Our Project Team will produce a detailed technical specification and quotation considering all technical parameters (application, location, flow rate, medium type, electrical supply plus ensure it adheres with current regulations).

Our Project Coordinators are trained in all technical aspects to ensure that the most cost effective and efficient solution is offered.

INSTALLATIONS

Our services range from the installation of new control equipment, submersible pumps through to full pump station refurbishments.

Customers can simply assign the responsibility for the installation to our Project Team knowing that our team of experienced Project Coordinators and Service Engineers will complete the installation on time and within budget.

Upon completion a handover service is offered where our technical representative will attend site and conduct an onsite demonstration of the equipment.

APPLICATION

AFTER SALES

We offer a comprehensive range of after sales services that include:

- Planned servicing
- Emergency call-outs
- Commissioning
- Monitoring
- Tankering and Jetting

Our engineers are fully trained in all aspects of working with pumped drainage systems, as well as being specifically trained in the use of gas detection equipment, confined space entry procedures and all relevant health and safety legislation.

Please contact our aftersales department on 01442 211554 for further information.

MAINTENANCE

The product should be inspected every three months.

A full visual inspection should be undertaken to the product to assess its overall condition, this must include all electrical and mechanical components.

In addition to the above it is important that the product undergoes regular servicing. As with all systems of this nature, regular maintenance is essential to ensure the system operates at its optimum level and fulfils its expected lifespan. The product must be maintained at intervals of:

Once per annum - Single residential dwelling
Twice per annum - Single residential dwelling where there is a risk of flooding as a result of product failure (for example, basement applications) & Multiple residential dwellings
Four times per annum - Commercial premises

HEALTH & SAFETY

Edincare Pumps are registered with British Safety Council, Constructionline, Safe Contractor, CHAS, ISO, Basement Waterproofing Association, PCA, FORS & NICEIC demonstrating our commitment to Health and Safety and our quality of workmanship.

DELIVERING PUMPED SOLUTIONS NATIONWIDE

Edincare Pumps has been established for over 25 years specializing in the manufacture, project design, sale, commission, service and repair of pumped drainage solutions.

OUR PRODUCT RANGE

- Packaged pumping stations
- Waste water pumping systems
- Macerators & macerating toilets
- Floor mounted pumping stations
- Fat, oil & grease separating systems
- Rainwater harvesting systems
- Battery Backup Systems
- Adoptable Pumping Stations
