

FLOOR MOUNTED PUMPING STATIONS

Magna SS Twin 2350/11/100

The Magna SS Twin 2350/11/100 is a fully automatic floor mounted pumping station offering dual horizontally mounted dry well pumps and a robust 2350 litre stainless steel chamber. The system is suitable for pumping both foul and storm water to a higher level when gravity drainage is not possible and/or economical to install.

Manufactured in robust stainless steel with ductile iron pipe work the MagnaSS couples top level aesthetics with hard wearing durability making it ideal for high level commercial installation. The system is supplied with a DN100 outlet and uses Edincare 'OpenCut' impellers. The control panel upstand also ensures the system can be installed in as compact an area as possible. The system is only suitable for three phase power.

KEY FEATURES

- 2350 litre storage capacity
- Robust and attractive stainless steel chamber system
- Automatic twin horizontally mounted 'OpenCut' pumps
- DN100 Outlet Connection
- space saving Control Panel Upstand
- Bespoke systems available – contact our sales team to discuss

PUMP CURVE

DIMENSIONS

CHAMBER	LENGTH	WIDTH	HEIGHT
	1250mm	1250mm	1500mm

CONTROL PANEL	HEIGHT	WIDTH	DEPTH
	500mm	400mm	210mm

WEIGHT

TECHNICAL SPECIFICATION

CHAMBER	
Colour	Silver
Material	Stainless Steel
Capacity	2350 l
Lifting eyes	No
Discharge size	DN100

PUMP	
No. of pumps	2
Pump type	Contrablock
Power supply	3 PHASE
Rated current	6.4A
Motor rating	2950W
Revolutions per min.	1450rpm
Max. vertical	11m
Max. flow rate	44 l/sec
Frequency	50Hz
Max liquid temp.	<40°C
Cable length	10m

CONTROL PANEL	
Material	Metal
Volt free contact	Yes
Voltage	415V
Volited contact	24V

LEVEL CONTROLS	
Material	Stainless Steel
Cable length	10m

SUITABLE FOR

WASTE TYPE

OPTIONAL EXTRAS

All our products can be customised to your requirements. For more information on this please contact our Sales Team on **01442 211554**.

Magna SS Twin 2350/11/100

PROJECTS

SITE SURVEYS

We offer no obligation On Site Surveys and Inspections of pumping schemes for refurbishment, installations, servicing, insurance assessment and general feasibility studies.

Our team of experienced Project Coordinators will survey your site to fully assess the specific requirements of your pumping scheme. Our Project Team will work with you to manage the process from start to finish.

The pumping scheme will be fully inspected mechanically, electrically and for operational capability with a full report of our findings, recommendations and quotation supplied.

PROJECT DESIGN

We offer a full in-house design service working from either site drawings, or where appropriate, undertake no obligation On Site Surveys.

Our Project Team will produce a detailed technical specification and quotation considering all technical parameters (application, location, flow rate, medium type, electrical supply plus ensure it adheres with current regulations).

Our Project Coordinators are trained in all technical aspects to ensure that the most cost effective and efficient solution is offered.

INSTALLATIONS

Our services range from the installation of new control equipment, submersible pumps through to full pump station refurbishments.

Customers can simply assign the responsibility for the installation to our Project Team knowing that our team of experienced Project Coordinators and Service Engineers will complete the installation on time and within budget.

Upon completion a handover service is offered where our technical representative will attend site and conduct an onsite demonstration of the equipment.

APPLICATION

AFTER SALES

We offer a comprehensive range of after sales services that include:

- Planned servicing
- Emergency call-outs
- Commissioning
- Monitoring
- Tankering and Jetting

Our engineers are fully trained in all aspects of working with pumped drainage systems, as well as being specifically trained in the use of gas detection equipment, confined space entry procedures and all relevant health and safety legislation.

Please contact our aftersales department on 01442 211554 for further information.

MAINTENANCE

The product should be inspected every three months.

A full visual inspection should be undertaken to the product to assess its overall condition, this must include all electrical and mechanical components.

In addition to the above it is important that the product undergoes regular servicing. As with all systems of this nature, regular maintenance is essential to ensure the system operates at its optimum level and fulfils its expected lifespan. The product must be maintained at intervals of:

- Once per annum - Single residential dwelling
- Twice per annum - Single residential dwelling where there is a risk of flooding as a result of product failure (for example, basement applications) & Multiple residential dwellings
- Four times per annum - Commercial premises

HEALTH & SAFETY

Edincare Pumps are registered with British Safety Council, Constructionline, Safe Contractor, CHAS, ISO, Basement Waterproofing Association, PCA, FORS & NICEIC demonstrating our commitment to Health and Safety and our quality of workmanship.

DELIVERING PUMPED SOLUTIONS NATIONWIDE

Edincare Pumps has been established for over 25 years specializing in the manufacture, project design, sale, commission, service and repair of pumped drainage solutions.

OUR PRODUCT RANGE

- Packaged pumping stations
- Waste water pumping systems
- Macerators & macerating toilets
- Floor mounted pumping stations
- Fat, oil & grease separating systems
- Rainwater harvesting systems
- Battery Backup Systems
- Adoptable Pumping Stations
