

AquaSafe Alarm (Mini)

The AquaSafe Alarm is a warning system which alerts the end user when there is:

- A power failure to the AquaSafe Alarm
- A high level situation in the chamber/sump
- A high level situation recorded
- A service due

There is a battery incorporated within the panel to power itself in case of mains power failure.

The system activates via a mini float switch (sump float version available), which is located inside the chamber/sump. It is set to activate higher than the activation point of the primary pump.

KEY FEATURES

- Three volt-free contacts for connection to external systems
- Can be retrofitted
- An internal battery ensures the alarm can operate for 24 hours in the event of mains failure
- Includes a mini float switch with a 5m cable

* The float comes with a 5m cable. A cable extension and junction box (not supplied) is required if the alarm is installed more than 5m from the base of the chamber.

TECHNICAL DATA

AquaSafe Alarm

Power supply	230V AC 50Hz
Rated power	<10VA
Internal battery	6V, 1.3Ah
Sound alarm level	85dB
Mains power cable length	1m
Weight	0.5kg
Material	ABS
Colour	Grey
Operating temperature	-10°C to +40°C

DIMENSIONS (mm)

Product	Height	Width	Depth
AquaSafe Alarm	122	124	85

VOLT-FREE CONTACTS

The AquaSafe Alarm has three volt-free for connection to remote telemetry or a building management systems. They can be set to Normally Open (NO) or Normally Closed (NC) depending on external system requirements.

- High level volt free contact
- Power fail volt free contact
- Service due volt free contact

CONFORMITY

- The Low Voltage Directive, EN61010:2010.
- The EMC Directive EN55014:2006, A1 and EN55014-2:2015.

All our products can be customised to your requirements. For more information on this please contact our sales team on 01442 211554.

DELIVERING PUMPED AND DRAINAGE SOLUTIONS FOR OVER 25 YEARS

Packaged pumping stations

Waste water pumping systems

Macerators and macerating toilets

Floor mounted pumping stations
