

# RemotaPro

The RemotaPro is a fully automatic floor mounted pumping system suitable for pumping waste from a complete bathroom to a higher level when gravity drainage is not possible and/or economical to install.

The system is suitable for installing either at the initial building stage or retro fitting to existing buildings and can accept waste connections from a toilet, basin, shower or bidet. The system consists of a robust polyethylene chamber, single grinder pump, internal pipe work, 2" PVC outlet and variable 110mm inlet.

The system does not need to be connected directly onto the toilet and as such is ideal for remote installation (indoors only) and therefore can be concealed out of sight. The RemotaPro is highly reliable due to powerful grinder pump and is available with a variety of alarm and control options.

## KEY FEATURES

- Designed for remote installation, can be concealed out of sight
