

AutoFlush160HT

The AutoFlush160HT is a fully automatic pumping station suitable for pumping hot water (up to 90°C) to a higher level when gravity drainage is not possible and/or economical to install.

The system is offered with 160 litre storage capacity. The compact chamber is ideal for accepting waste from utility sinks, commercial dishwashers, tea points or similar. The pump discharges through small bore pipe work for installation through busy service voids and roof spaces.

The system consists of a sealed GRP chamber, internal pipe work and fittings, automatic 'OpenFlow' high temperature submersible pump and solvent weld outlet connection.

The AutoFlush160HT is easy to install as inlets can be drilled to suit site requirements (inlet information to be supplied at time of order).

KEY FEATURES

- High-temperature pump suitable for wastewater up to 90°C
- Robust high-temperature GRP chamber with 160-litre storage capacity
- Variable inlet positions offer high versatility on site
- A range of control panels, alarms and remote alerts are available offering peace of mind to the end user
- Installation of an optional low level float enables a low level inlet into the chamber

PUMP CURVE

DIMENSIONS (mm)

TECHNICAL DATA

CHAMBER

Colour	White
Material	GRP
Weight	20 kg
Lifting eyes	No
Capacity	160 litres
External discharge size	1½"

PUMP

Number of pumps	1
Power supply	230 V AC
Rated current	3.9 A
Motor rating	830 W
Frequency	50 Hz
Revolutions per minute	2510 rpm
Max vertical output	10 m
Max horizontal output	70 m
Horizontal fall	1:200
Max flow rate	330 l/m
Max liquid temperature	<90 °C
Discharge size	1½"
Cable length	3 m

WASTE TYPE

Grey High temp

OPTIONAL EXTRAS

Control equipment Battery backup Monitoring Pipework (external) Level controls Additional inlets
