

# Dosing Pump (Battery Operated)

The Dosing Pump (Battery Operated) is a simple, easy and intuitive dosing device to be installed in kitchens for the removal of fats in drain pipes, grease separator systems or other places where dosing at certain intervals of the day is required.

It is battery powered and has a compact enclosure so can be installed in restricted spaces without the need for a mains supply.

Its peristaltic dosing pump measures and delivers a pre-programmed quantity of BioFax grease digesting enzyme into the drain or grease trap, breaking up the fats and oils that cause blockages, overflows and unpleasant odours and allowing them to be washed away.

All passive grease traps should be installed with enzyme dosing pumps.

## DIMENSIONS mm

## WASTE

## TECHNICAL DATA

Power	6 V DC
Batteries	4x D-cell battery pack
Pump type	Peristaltic
Flow rate	6 l/h, fixed, intermittent
Max. back pressure	1 bar
Operating temp	5°–50°
Enclosure material	ABS
Squeeze tube	Santoprene
Ingress protection	IP65

## KEY FEATURES

- Powered by 4 x D-cell battery pack
- Doses enzymes at pre-defined periods
- Level control input
- Manual pump priming via button on front panel
- IP65-rated enclosure
- Easy to install and simple to maintain
- Cost-effective solution
- Suitable for installation in restricted spaces
- Programming via OLED display and keypad
- Optimised battery consumption (with sleep mode)
- Password protection
- Up to 12 cyclic programmable dosing events
- Accurate programmable dosing quantity
- Interval can be set in minutes, hours or days
- Logs activation time and estimated dose
- Battery life: 1 year @ 1 dose per day
