

WaterGuard (Eco) 6500

KEY FEATURES

- 6,500 litre total storage capacity constructed from 100% recycled polyethylene
- Overflow to storm drain or soakaway
- Offers unregulated use of your outdoor tap
- Can also be used on non-potable appliances in the property such as washing machines and WC's
- Mains water top-up panel
- Reduces mains water consumption
- Environmentally-friendly

WASTE

Storm

WaterGuard (Eco) 6500 is a fully automatic rainwater harvesting system used for the collection and supply of rainwater within both domestic and commercial applications.

It is designed to accept rainwater from downpipes, which is then filtered into a collection tank ready to be used to serve an outdoor tap or for non-potable appliances in the property such as washing machines and WC's.

The system consists of a 100% recycled polyethylene tank with locking pedestrian duty access cover, connections for all connecting pipework, submersible pump with floating water intake and self-cleansing Optimax filter package complete with overflow syphon and calmed inlet. It also features a fully-automatic mains water top-up panel and float kit to maintain the water level within the chamber during dry spells. It includes 25 m of 25 mm HDPE hose for the discharge line.

This environmentally-friendly system offers unregulated use of your outdoor tap and also saves money through reduced mains water consumption for domestic appliances.

INCLUDED

WaterGuard (Eco) 6500 system comes with:

- 6500 litre polyethylene chamber
- Telescopic Dome Shaft 'Mini', pedestrian duty
- Integral Optimax Filter package
- Fully-automatic submersible pump
- Flexible internal pipework
- Fully-automatic mains water top-up panel
- 25 m HDPE hose, 25 mm c/w fittings

Optimax Filter package
